# Intellectual Disability: Theory into Practice

## **Enrol NOW for 2021 – Semester 1**

The aim of this *Interprofessional* paper is to develop your knowledge base, practical and clinical skills as a practitioner working in this specialist field, and in working alongside people with intellectual (learning) disability. The content is underpinned by evidenced-based practice and current philosophy grounded on changing models of disability. Links are made between physical and mental well-being, sociological, pharmacological, behavioural, Interprofessional and ethical approaches across the lifespan.
